

Representative Project:

**Town of Platteville, CO
Comprehensive Plan**

Plan Tools, LLC worked in association with Kendrick Consulting and Russell + Mills Studios to update Platteville’s comprehensive plan.

The 2017 Town of Platteville Comprehensive Plan (Plan) succeeds the Town’s 2010 comprehensive plan as the master plan for Platteville. The Plan is a direct result of citizen involvement aimed at creating a planning document that embodies the Town’s vision for its future growth and development.

Public engagement began with a business appreciation luncheon and community picnic at Platteville’s Library Park on July 21, 2016. A survey to identify community attitudes and planning preferences was distributed to attendees. The survey results, along with feedback received from exercises conducted during the event, helped shape the update of the Town’s comprehensive plan.

A project website – GrowingPlatteville.com – provided up-to-date information concerning public workshops, the questionnaire and its results, and draft maps and project documents as they were produced. An additional community open house event was held at the South Valley Middle School on January 25th, 2017, presenting the general public an opportunity to review and respond to draft Plan information. A joint work session with the Town Board and Planning Commission preceded public hearings for each approval authority.
